

The Global Cybersecurity Market 2014– 2024

Report Price: US\$4,800
(Single User)

Summary

“The Global Cybersecurity Market 2014–2024” offers the reader detailed analysis of the global Cybersecurity market over the next ten years, and provides market size forecasts. It covers the key technological and market trends in the Cybersecurity market.

The global Cybersecurity market is estimated to value US\$XX billion in 2014 and increase at a CAGR of XX% during the forecast period, to reach its peak of US\$XX billion by 2024. The market consists of four categories: network security, data security, identity and access security and cloud security. The network security segment is expected to account for XX% of the global cybersecurity market, followed by data security with XX%, identity and access security with XX%, and cloud security with XX% of share. During the forecast period, the cumulative global expenditure on cybersecurity is expected to reach US\$XX billion.

“The Global Cybersecurity Market 2014–2024” provides detailed analysis of the current industry size and growth expectations from 2014 to 2024, including highlights of key growth stimulators. It also benchmarks the industry against key global markets and provides a detailed understanding of emerging opportunities in specific areas.

Key Findings

Over the last 10 years, the Internet, has been transformed into a battleground for many modern conflicts, with groups of hackers trying to publicize their cause, and several of these groups acting on behalf of their respective governments in order to disrupt critical processes or steal valuable data. Wars include a mix of physical, mental, and tactical elements, with information and communication technologies (ICT) playing a major role in the capabilities of mobile forces armed with real-time information devices. These ICTs can also be used to attack battlefield systems directly, to capture sensitive data from defense contractors and governments, or disrupt national infrastructure. As such, defense systems must be built to detect and counter these attacks, making cyber warfare systems essential tools for maintaining an advantage in modern conflicts. The need to protect such vital networks, coupled with the increased importance of such systems in modern warfare, means global spending on cyber security is expected to remain robust over the forecast period.

Key Features and Benefits

The report provides detailed analysis of the market for Cybersecurity during 2014–2024, including the factors that influence why countries are investing or cutting expenditure on these segments. It provides detailed expectations of growth rates and projected total expenditure.

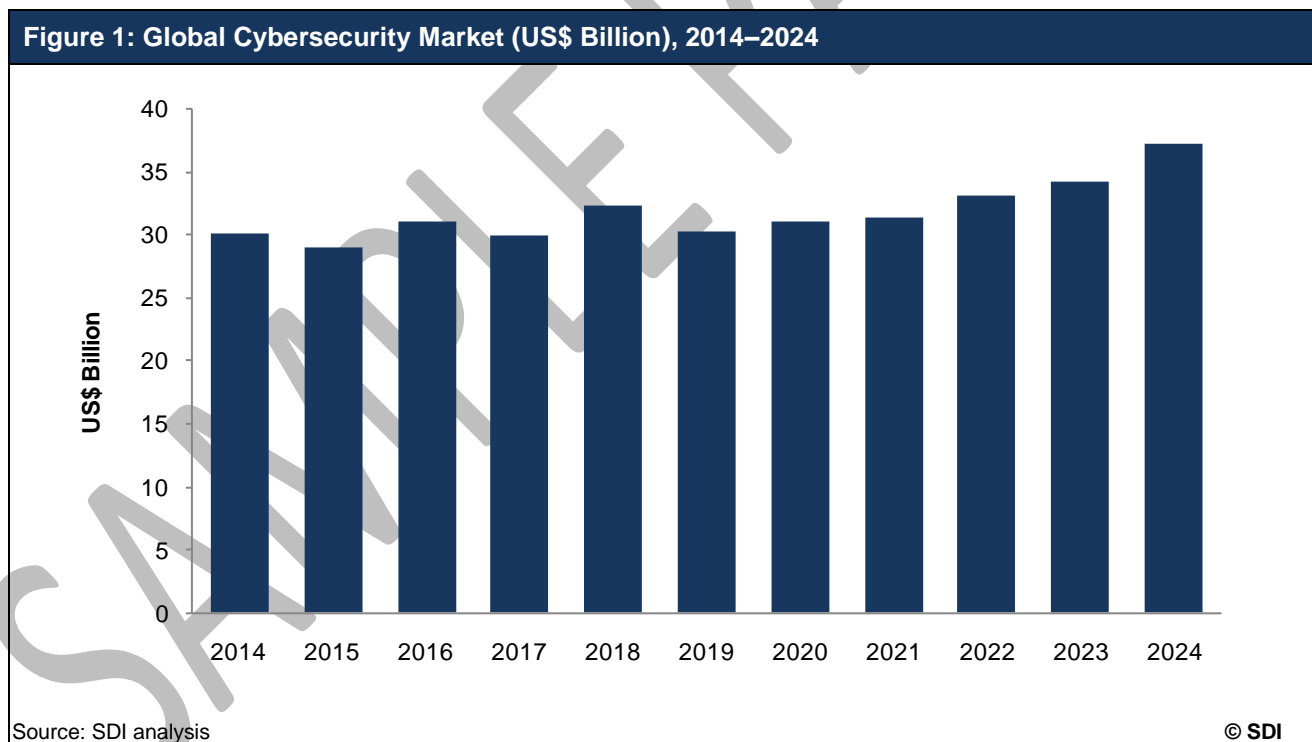

1 Global Cybersecurity Market Size and Drivers

1.1 Cybersecurity Market Size and Forecast 2014–2024

1.1.1 Global cybersecurity market expected to witness a robust growth over the forecast period

The global cyber security market is projected to record robust growth in spending over the forecast period, due to the rise in cyber-attacks on the military and other critical IT infrastructure. Countries across regions are now focusing on establishing and developing their cyber security infrastructure, an area of defense spending that was neglected until recently. The cyber security market is increasing at a CAGR of XX%, from US\$XX billion in 2014, to value US\$XX billion in 2024. The market consists of four categories of cybersecurity: network security, data security, identity and access, and cloud security. The network security segment is expected to account for XX% of the global cybersecurity market, followed by data security, identity and access, and cloud security, with shares of XX%, XX%, and XX% respectively. During the forecast period, cumulative global expenditure on cybersecurity is expected to reach US\$XX billion.

The chart below shows the expected cybersecurity market value during 2014–2024:

The Global Cybersecurity Market 2014–2024

1.2 Global Cybersecurity Market – Regional Analysis

1.2.1 North America is expected to lead the global cybersecurity market

The global cybersecurity market is dominated by North America, with the US being the largest defense spender in the world; overall, North America is set to spend US\$XX billion on cybersecurity during the forecast period. Despite the scheduled budget cuts in the US and Western Europe, authorities in these countries have protected and prioritized investments in areas such as cybersecurity, special operations, and intelligence, surveillance, and reconnaissance assets.

Asia Pacific represents the second-largest market, with the total cybersecurity market valued at around US\$XX billion, offering a potentially attractive investment opportunity for suppliers. Europe is projected to spend an estimated US\$XX billion on cybersecurity during the forecast period, followed by the Middle East and Latin America, with US\$XX billion and US\$XX billion respectively.

The table below gives a brief overview of the cybersecurity market:

Table 1: Global Cybersecurity Market Overview				
Region	Market in 2014	Market in 2024	Total Market (2014–2024)	Annualized growth/decline (2014–2024)
North America	US\$XX billion	US\$XX billion	US\$XX billion	XX%
Asia-Pacific	US\$XX billion	US\$XX billion	US\$XX billion	XX%
Europe	US\$XX billion	US\$XX billion	US\$XX billion	XX%
Middle East	US\$XX billion	US\$XX billion	US\$XX billion	XX%
Latin America	US\$XX billion	US\$XX billion	US\$XX billion	XX%
Africa	US\$XX million	US\$XX billion	US\$XX billion	XX%
Total Cybersecurity Market	US\$XX billion	US\$XX billion	US\$XX billion	XX%

3 Country Analysis – Cybersecurity

3.1 United States Market Size and Forecast 2014–2024

The US has the world's largest defense budget and the largest share of expenditure on cybersecurity in the world. Recent years have witnessed increasing instances of cyber-intrusion, some of which appear to be tied to US major rivals such as Russia and China. The threat posed by China is not new, but the frequency of attacks originating from the country is a matter of prime concern. The recent intrusions at some of the important US establishments including International Monetary Fund, Lockheed Martin, Citibank, NASDAQ, and Google, and the digital infiltration of the RQ170 Sentinel drone by Iran, point towards a need for the urgent strengthening of the existing cyber security infrastructure.

The growing importance being placed on cyber security can be gauged by the proposed increase of 21% in the Presidential budget for 2014 for various cyber defense initiatives, at a time of overall defense budget cuts. The additional expenditure would sponsor projects such as NETCENTS-2, National Cyber Range (NCR) - Phase –II, Cyber Crime Center (DC3), Agile Cyber Technology (ACT) program, DARPA - Active Authentication Program, and DHS - EINSTEIN / National Cybersecurity Protection System (NCPS).

Report Methodology

Strategic Defense Intelligence (SDI) dedicated research and analysis teams consist of experienced professionals with a background in industry research and consulting in the defense sector. The market size is derived by consolidating ongoing procurement programs, modernization initiatives, and future procurement plans, utilizing information gathered through primary and secondary sources. Forecasting is conducted based on the lifetime of current inventory levels, suitability/need of the weapon category for a specific country, budget availability, and opinion of leading industry experts. The following research methodology is followed for all databases and reports.

Secondary Research

The research process begins with exhaustive secondary research to source reliable qualitative and quantitative information related to the global cybersecurity market. The secondary research sources that are typically referred to include, but are not limited to:

- Globally renowned think tanks
- Industry associations
- National government documents and statistical databases
- Company websites, annual reports, financial reports, broker reports, and investor presentations
- Industry trade journals and other literature
- Internal and external proprietary databases
- News articles, press releases, and webcasts specific to the companies operating in the market

Primary Research

SDI conducts hundreds of primary interviews a year with industry participants and commentators in order to validate its data and analysis. A typical research interview fulfills the following functions:

- Provides first-hand information on market size, market trends, growth trends, competitive landscape, and future outlook.
- Helps to validate and strengthen secondary research findings.
- Further develops the analyses team's expertise and market understanding.

The participants who typically take part in such a process include, but are not limited to:

- Industry participants: CEOs, VPs, business development managers, market intelligence managers, and national sales managers.
- External experts: investment bankers, valuation experts, research analysts, and key opinion leaders specializing in defense markets.

The Global Cybersecurity Market 2014–2024

Conventions

- Currency conversions are performed on the basis of average annual conversion rate format calculations.
- All the values in tables, with the exception of compounded annual growth rate (CAGR) and compounded annual rate of change (CARC) are displayed to one decimal place. Growth rates may, therefore, appear inconsistent with absolute values due to this rounding method.

TABLE OF CONTENTS

1	Introduction	15
1.1	What is this Report About?	15
1.2	Definitions	15
1.3	Summary Methodology.....	17
1.4	About Strategic Defence Intelligence.....	18
2	Executive Summary	19
3	Global Cybersecurity Market Size and Drivers	21
3.1	Cybersecurity Market Size and Forecast 2014–2024.....	21
3.1.1	Global cybersecurity market expected to witness a robust growth over the forecast period	21
3.2	Global Cybersecurity Market – Regional Analysis	22
3.2.1	North America is expected to lead the global cybersecurity market	22
3.2.2	High demand for cybersecurity systems in the US to support overall market growth	24
3.2.3	Cybersecurity market expected to grow at a CAGR of XX% in the Asia-Pacific region	26
3.2.1	European cybersecurity market expected to account for the second highest spending over the forecast period	28
3.2.2	Markets in the Middle East to register a robust growth.....	30
3.2.3	Cybersecurity is still a developing area of defense in the Latin American region.....	32
3.2.4	Markets in Africa expected to increase over the forecast period	33
3.3	Cybersecurity Sub–Sector Market Size Composition.....	34
3.3.1	Market for network security to dominate the cybersecurity market.....	34
3.3.2	Data security market to experience robust growth over the forecast period.....	37
3.3.3	Identity and access segment to account for XX% of market.....	39
3.3.4	Cloud security market to grow at a CAGR of XX%	41
3.4	Demand Drivers and Growth Stimulators.....	43
3.4.1	Increased dependence on information technology resulting in more cyber attacks	43
3.4.2	Dynamic nature of cyber threats warrants increased spending on innovative technologies	43
3.4.3	Need to protect cloud data to lead to higher cybersecurity spending	43
3.5	Defense Budget Spending Review	45
3.5.1	European capital expenditure expected to increase during the forecast period	45
3.5.2	Asian defense budgets expected to increase at a robust pace	46
3.5.3	North American defense expenditure projected to increase marginally during the forecast period	47
3.5.4	Modernization programs likely to drive defense expenditure in South American countries	48
3.5.5	Military budgets of African countries expected to increase during the forecast period.....	49

The Global Cybersecurity Market 2014–2024

3.5.6	Defense budgets of Middle Eastern countries likely to increase during the forecast period	50
3.6	Defense Modernization Review	51
3.6.1	Financial constraints causing delays in European defense modernization programs	51
3.6.2	Defense budgets of Asian countries likely to be driven by competitive arms acquisitions	51
3.6.3	Global economic slowdown leading to defense budget cuts in the North American region	51
3.6.4	Need to replace aging equipment driving South American defense expenditure	52
3.6.5	Security threats increasing the defense budget of African countries	52
3.6.6	Demand for air defense systems is likely to increase in the Middle East	52
4	Industry Trends, Recent Developments, and Challenges	54
4.1	Technological Developments	54
4.1.1	Signcryption technology is expected to be part of most of the new cybersecurity measures	54
4.1.2	Network based IP sensor to enable detection of cyber attacks	54
4.1.3	Machine Learning technology to be the new platform for future cyber security measures	54
4.1.4	FlowID10G to enable constant internet traffic monitoring	55
4.1.5	Japan developing defensive cyber weapon	55
4.2	Market Trends	56
4.2.1	Enhanced use of encryption	56
4.2.2	Resistance to cloud technology	56
4.2.3	Development of offensive cyber weapons on the rise	56
4.2.4	Middle East emerging as one of the major markets in Cybersecurity	57
4.3	Industry Consolidation	58
4.3.1	Joint R&D programs expected to increase over the forecast period	58
4.3.2	Cyber security domain recording robust M&A activity	59
4.4	Key Challenges	60
4.4.1	Lack of exhaustive databases on malware and their sources impeding the global cyber defense sector	60
4.4.2	Counter measures against cyber weapons expected to be a significant challenge in the future	60
4.4.3	Mobile and Wireless technologies increasing vulnerability of cyber networks	60
5	SWOT Analysis of the Cybersecurity Market	62
5.1	Strengths	63
5.1.1	Increase in cyber attacks	63
5.1.2	Technological advancements ensure continued operational demand	65
5.1.3	Reforms in defense spending to favor cyber security systems	66
5.2	Weaknesses	67
5.2.1	Probability of cyber threats being exaggerated	67
5.2.2	Lack of skilled personnel	67
5.2.3	Lack of cyber security enforcement in the Latin American and African regions	68

The Global Cybersecurity Market 2014–2024

5.3 Opportunities	69
5.3.1 A dynamic industry provides many avenues for growth, especially for established companies.....	69
5.3.2 Need for databases to effectively combat cyber crime	69
5.4 Threats	71
5.4.1 Limited budget and weak infrastructure in less developed countries	71
5.4.2 Lack of transparency in information sharing	71
6 Country Analysis – Cybersecurity	72
6.1 United States Market Size and Forecast 2014–2024	73
6.1.1 Network security segment expected to account for the largest segment during the forecast period	77
6.1.2 Data security segment expected to accounts for XX% of the market during the forecast period.....	79
6.1.3 Cloud security segment expected to grow at a CAGR of XX% over the forecast period	81
6.2 France Market Size and Forecast 2014–2024	82
6.2.1 Network security segment expected to account for the largest share of the French cybersecurity market	85
6.2.2 The market for data security in France is expected to grow at a CAGR of XX%.....	87
6.2.3 Expenditure on identity and access expected to grow at a CAGR of XX% over the forecast period	88
6.3 UK Market Size and Forecast 2014–2024	89
6.3.1 Network security segment expected to account for the largest segment in the UK.....	92
6.3.2 Spending on the data security expected to grow at a CAGR of XX% over the forecast period	93
6.3.3 Identity and access segment accounts for XX% of the market during the forecast period.....	94
6.4 Russia Market Size and Forecast 2014–2024	95
6.4.1 Network security segment account for the largest area of expenditure by Russia	98
6.4.2 Data security market to account for XX% of the Russian cybersecurity market.....	99
6.4.3 Expenditure on identity and access expected to grow at a CAGR of XX% over the forecast period	100
6.5 Saudi Arabia Market Size and Forecast 2014–2024	101
6.5.1 Network Security expected to grow at a CAGR of XX% over the forecast period	104
6.5.2 Data Security to account for the second largest market segment in Saudi Arabia over the forecast period	105
6.6 UAE Market Size and Forecast 2014-2024.....	106
6.6.1 Network Security market to grow at a CAGR of XX% during the forecast period.....	109
6.6.2 Data Security market to account for the second largest segment of investment during the forecast period	110
6.7 Israel Market Size and Forecast 2014-2024	111
6.7.1 Network Security to account for the largest area of expenditure during the forecast period	113
6.7.2 Data Security market in Israel to grow at a CAGR of XX% over the forecast period.....	114
6.8 South Korea Market Size and Forecast 2014-2024	115
6.8.1 Network Security expected to account for the largest share of the South Korean cyber security market	118

The Global Cybersecurity Market 2014–2024

6.8.2	Data security Anticipated to account for the second largest segment	119
6.8.3	Identity and access security Segment to account for the third largest segment of expenditure	120
6.9	China Market Size and Forecast 2014-2024.....	121
6.9.1	Network Security expected to constitute the largest market share in China.....	124
6.9.2	Data Security expenditure to increase at a CAGR of XX%.....	126
6.9.3	Identity and access segment expected to grow at a CAGR of XX% over the forecast period	128
6.10	Indian Market Size and Forecast 2014-2024	129
6.10.1	Network Security expected to grow at a CAGR of XX% over the forecast period	132
6.10.2	Data Security is expected to account for the second largest share of expenditure by India during the forecast period	134
6.10.3	Identity and Access to account for the third largest segment of expenditure on Indian cyber security ..	135
6.11	Brazil Market Size and Forecast 2014–2024	136
6.11.1	Network security segment expected to lead the cybersecurity expenditure during the forecast period ..	139
6.11.2	Data security segment to grow at a CAGR of XX% during the forecast period	141
6.12	South Africa Market Size and Forecast 2014–2024	143
6.12.1	Network Security expected to account for the largest segment of expenditure	145
6.12.2	Data Security expected to account for the second largest category of expenditure in South Africa	146
6.12.3	Identity and access segment accounts for XX% of the market during the forecast period.....	147
6.13	Nigeria Market Size and Forecast 2014–2024.....	148
6.13.1	Network Security expected to account for the largest segment of expenditure	150
6.13.2	Data Security to account for the second largest area of expenditure by Nigeria.....	151
7	Major Cybersecurity Programs	152
7.1	Network security	152
7.1.1	US – Einstein Intrusion Detection System Program	152
7.1.2	US - Cyber Genome Program.....	153
7.1.3	France - Réseau IP de la Force AeroNavale (RIFAN) Stage Two	154
7.2	Data Security.....	155
7.2.1	US - Automated Program Analysis for Cybersecurity (APAC).....	155
7.2.2	US – Modernize Diplomatic Security Systems.....	156
7.3	Identity and Access	157
7.3.1	US - Active Authentication Program (AAP)	157
7.3.2	US - Cyber Crime Center (DC3)	158
7.3.3	France – Through-life support for Biometric Data Acquisition System	159
7.4	Cloud Security.....	160
7.4.1	US - Mission-oriented Resilient Clouds (MRC).....	160
